THE RETURN OF:

****
* GUTTER DOPE! *
****

Radio Club Program Friday March 21, 1969,8 PM, Durhams business college:: Bill Jeffers of the sports car club will be present to discuss the upcoming race on May 3&4. Also, due to the lack of interest in the club, the treasury will be divided up among those few who richly deserve it.

BULLETIN form W5EDZ: Due to the highly efficient technical operation of the air force mars repeater by K5ALX, its operation has been turned over to Ernie Brown (no known call) the internationally recognized expert.

W5EJT is trying to convince Ruth that he should buy the camper a few weeks early, so he can have it for field day.
Speaking of field day, our field day chairman, whoever he is has definitely made reservations NOT to have it at Woodlawn lake this year.
QUESTION: How will the return of the equipment that Aubrey reported to have been stolen from hemisfaiR affect his purchase of a new car?
Rumor has it that the hams at Kelly are trying to organize a club. So far mucho talk, poquito action. Manana, maybe?
Just how far does W5PEK think he can talk with no rig tied to that mobile antenna?
AND, how is it that the hams with the newest, fanciest cars have the crummiest mobile signals? Also, I think that we have solid proof that these "no hole" antenna mounts work poorly if at all.
And who started the rumor that amateur FM uses 5 kc deviation? Some nut with an IQ of the same number,probably. Must be a throwback to the days when K5PWX and his buddies set frequency every day to keep up with a freq. meter that drifted at a rate of about a Mc. per minute.
K5AUW expects a new harmonic shortly; the pope should be happy.
The SARC board of directors meeting,as announced at the last club meeting, met at W5LVE's Saturday. Since hardly anybody showed up, the business was quickly taken care of, and the meeting adjourned to a verrrry interesting establishment on the far north side. Bill Hauck doesnt run a very tight ship.
So far this year, the SARC has had programs featuring speakers from SWRI, SAC, TEX CD, USAF, on subjects ranging from state of the art semiconductor technology to emergency communications effectiveness- when the @#&¢*&% are the club brass going to get some GOOD programs?
The repeater organization, which meets on the Saturday immediately following SARC meetings had a full session last meeting; officers were elected: Pres. W5QMU Larry, the only member with a gold convertible
Vice pres. W5ETG Terry, fresh from a resounding success as pres of SARC. Secretary W5PSQ Dick, since he's getting married,
Treasurer K5PKX MD was returned to this office, at least until he finishes buying a new car. Also W5VPQ was kept as trustee of the license, since he threatened to turn off the 2meter band if he wasn't re-appointed. He also reminded us that he is sole FCC licensee on 52.525 in this area.
Further action at the meeting was a day of reckoning for the cheapskates, as the Tulsa dues structure was approved for SARO. Those members that kick in the $10 a year will find it a bargain, with an automatic phone patch as the first additional facility, as well as many other features not now available. Notice that the first SARO station will operate on 146.34/146.94, replacing the present low output,insensitive receiver junk operated by W5VPQ. Later, the .28/.88 facility will be added to the .34/.94. The patch will be installed on the .94 system, and moved when the other frequencies are activated.
May 2 meeting: Field day pre-planning. May 3&4 Race. May 16, West G ulf D irectors report. July 4-6 Nuevo Laredo Hamfest
